

## Pharmacy Technician Resources Order Form

In preparation for the national Pharmacy Technician Certification Examination, familiarity with the material contained in any of the basic technician training manuals is advisable. Four of the major reference texts recommended for review prior to the examination are now available through the Tennessee Pharmacists Research and Education Foundation (TPREF).

**Pharmacy Certified Technician Training Manual (Tenth edition) \$40.00**

Published for over 20 years by the Michigan Pharmacists Association, the PCT<sup>®</sup> Training Manual is an invaluable reference for practicing technicians and an excellent guide to preparing for the national exam. This Manual is a revised and updated training tool designed to include the Second Edition of the Calculations Workbook. This manual contains many clinical topics not previously addressed, as well as information on Medicare Part D.

**Pharmacy Certified Technician Calculations Workbook (Second edition) \$20.00**

This publication was designed to be used in conjunction with the PCT<sup>®</sup> Training Manual and will assist the pharmacy technician in preparing for the calculations portion of the national examination.

**The Pharmacy Technician Certification Review and Practice Exam \$30.00**

Developed in cooperation with the Illinois Council of Health-System Pharmacists, this book helps technicians prepare for the pharmacy technician certification exam. Topics include pharmacy law, medication order and prescription interpretation, pharmaceutical calculations, drug distribution and more. Also included is a practice exam, a commonly-prescribed medications chart, and test-taking strategies.

**Pharmacy Technician Certification: Quick Study Guide \$28.00**

Offered by APhA, this is an excellent resource designed for brushing up on key technician skills. Use alone as a refresher, or in conjunction with any of the other resources being offered for a more comprehensive review, this manual elaborates on the list of necessary technician skills outlined in the Pharmacy Technician Certification Board's Candidate Handbook.
